SpectraTop

Recreational Surfacing

SpectraTop recreational surfacing is comprised of the half-inch “top layer only” found on our SpectraPour and other 2-layer poured systems. SpectraTop is ideal for athletic use, workout and fitness areas, walking tracks, tricycle tracks, field events, small jogging tracks and other applications not requiring a cushion layer.

SpectraTop is mixed on-site, and may be used to provide ADA access to existing playgrounds. It may also be used to re-top existing poured-in-place play systems requiring a new top layer.

SYSTEM DATA

- Half-inch-thick wearing surface of rubber granules – mixed, poured & troweled on-site
- Available in 20 colors (colors can be mixed)
- Create custom shapes and designs
- May be installed over concrete, asphalt or as a new top layer over existing poured-in-place surface
- Typically used outdoors
- Conforms to ASTM E303 for Skid Resistance and ASTM D2047 for Coefficient of Friction
- Available for LEED® credits
